

POWER OF BIOGRAPHIES

It seems like life can be really challenging sometimes. I wonder what effect these difficulties have on us? Here I would like to tell you about my passion that made me ask this very question: biographies. Each of them tells a different story. Actually, it would be better to call it life rather than a story. As a film lover, I am devoted to finding the common message of these biographies. Because I believe that if I can put these puzzle pieces together, I can watch biographies more enthusiastically. I think I have actually found this common feature: the difficulties of life. The biographies talk about the difficulties that people

experience in their lives in a very interesting way in each story. For instance, some of them describe miraculous survivors in the face of difficulties. A Beautiful Mind, The Theory of Everything... Legendary films like these show the difficulties experienced in life but also they show the necessity of producing solutions without hesitation. Isn't it amazing? This is why I love

biographies. All of them motivate us to look at life with hope and to stand strong against difficulties even in the most impossible situation.

In another form of functioning in biographies, as a result of a long and difficult struggle against difficulties, an unpleasant defeat arises in front of the character. These defeats allow us to learn about mistakes made by the main characters and overcome some difficulties in our own lives. The biopic "Amy" is also a tremendous film that gives exactly this message. It's a life story full of struggles, and as a result, Amy Winehouse is now ending up in the arms of death. But her story also enables us to learn some lessons from life. Of course, there are many more movies like these, but it's impossible to tell them all. They're all different worlds, but just like I mentioned, they actually have a common message. I'm comparing watching movies like this to solving puzzles. There are a lot of different options in our lives. Choosing the right message from the movies and living our lives accordingly will have truly remarkable effects. All though it's really hard to find and get the piece that shows the right way. But doesn't life depend on it anyway? **We create the meaning of life by taking a piece of each of them.**
